PROFESSIONAL SUMMARY

Full-Stack WordPress Developer with 4+ years of experience delivering 50+ client projects across agencies and direct clients. Bridges modern frontend (React, Tailwind CSS) with robust backend (PHP, MySQL, WordPress) to build high-performance, accessible websites. Experienced across the full delivery lifecycle — from design concepts to deployment — with familiarity in Laravel MVC architecture and AI-assisted development workflows.

CORE COMPETENCIES

Frontend: React.js, Tailwind CSS, JavaScript, HTML5/CSS3, Bootstrap, SASS/SCSS, Responsive Design

Backend: WordPress (Themes, Plugins, Headless), PHP, MySQL, WPGraphQL, Laravel (MVC — familiar)

Tools & Deployment: Linux, Git/GitHub, cPanel, VPS, Next.js, PM2

EXPERIENCE

Waveplus IT Solutions

Jul 2024 — Present

Full Stack Developer

- Architect and deliver full-stack WordPress solutions — custom themes, plugins, and headless implementations — for international clients
- Bridge frontend (React, Tailwind CSS) and backend (PHP, MySQL) to build cohesive, high-performance websites
- Familiar with Laravel MVC architecture and structure; capable of working in Laravel projects with AI-assisted workflows
- Manage end-to-end deployment on cPanel and VPS environments, ensuring performance optimization and accessibility compliance

Nirvan Studio

Apr 2023 — Jun 2024

Mid Level Frontend Developer

- Owned the full frontend delivery lifecycle — from initial design concepts to implementation across WordPress, Laravel Blade templates, and React components as per client requirements
- Developed custom WordPress themes and plugins, translating complex design systems into maintainable code
- Built interactive UI components with React and integrated them into existing PHP-based projects
- Mentored junior developers on HTML/CSS best practices and responsive design techniques

Nirvan Studio

Mar 2022 — Mar 2023

Junior Frontend Developer

- Converted client design mockups into responsive, cross-browser compatible frontends using HTML, CSS, and JavaScript
- Built and maintained WordPress websites using custom themes and page builders
- Collaborated with designers to ensure pixel-perfect implementation of UI/UX specs
- Participated in client meetings to understand requirements and propose feasible frontend solutions

Nirvan Studio

Nov 2021 — Feb 2022

Web Design Intern

- Built foundational skills in HTML, CSS, and JavaScript while learning responsive design principles
- Assisted senior developers in translating design mockups into functional web pages
- Developed understanding of WordPress theme structure and template hierarchy
- Gained hands-on experience with browser dev tools and debugging workflows

KEY PROJECTS

Headless WordPress Portfolio Next.js + WPGraphQL

Built a portfolio site using Next.js frontend with WordPress backend via WPGraphQL. Implements modern Tailwind CSS design with dark theme, deployed on VPS with PM2 process management.

Reusable Component Library React + Tailwind

Designed and built a component library used across 15+ client projects. Standardized UI patterns for faster development and consistent design, reducing development time for new projects by reusing tested components.

EDUCATION

Bachelor's in Computer Engineering — Khowpa Engineering College

2016 - 2021

Specialized in Software Engineering, Data Structures & Algorithms, and Database Systems.

SKILLS

Frontend: HTML, CSS, JavaScript, React.js, Tailwind CSS, Bootstrap, SASS/SCSS, Responsive Design

Backend: WordPress Development, PHP, MySQL, WPGraphQL

Other: Linux, Git/GitHub, Deployment (cPanel, VPS), Headless WordPress, Next.js
